

History

In 1979, Kip Husk, a Junior in High School, began hand-painting signs at his Mothers' kitchen table. His clients were mainly local retail companies. After a short time in business, he established Husk Signs.

The clients soon began requesting various other types of signage such as banners, wooden and aluminum signs, billboard advertising and electric signs. Always willing to accept a challenge, Kip took the necessary steps to increase his companies flexibility and ensure the clients satisfaction.

These steps included the purchase of a manufacturing facility on the north-side of Evansville, IN, increased staff, and advanced production capabilities with the addition of computer automation.

After being accepted as an U/L sign manufacturer, electric signs, channel letters, neon and electronic message centers became the heart of his business.

Now, some 24 years later, his company has experienced an average growth of 30% per year and brings together a work force with over 250 years of experience.

Husk Signs has sign projects around the world. From coast-to-coast in the United States, Canada, Japan, Mexico and even Kuwait!

Facility

Husk Signs is located on the northside of Evansville, Indiana. Four buildings on four acres accommodates our manufacturing, sales, and administrative offices. We have 20,000 square feet under roof, and plenty of room to expand.

We are 1/2 mile from Evansville Regional Airport, and have easy access to Interstates. Kentucky, Michigan, Illinois, Missouri, Tennessee & Ohio are in our installation range. We have a network of nationwide installers to handle all other areas.
